

U.S. Department of Energy Draft Repository SEIS,
Draft Nevada Rail Corridor SEIS and Draft Rail
Alignment EIS

HEARING COMMENT SHEET

RRR000261

Name:

Rita L. Ransom

COMMENTS:

One more time, the people of NV just say "no!" to transporting & burying high level nuclear waste in Nevada. All three EISs are profoundly flawed in many ways; the best solution to our nuclear waste problem is to stop manufacturing it right now and to containerize it as safely as possible, as close as possible to its generation site. This is the 75-year old position of the Sierra Club and it has not changed. The EISs leave many concerns unaddressed such as:

(1) Threat of terrorism

(2) Unsuitability of Yucca Mtn due to lack of a true geologic barrier and likelihood of seismic activity

Please feel free to attach additional pages (if mailing, more postage may be needed.)

Please note: Your comment(s) must be received by the Department of Energy by January 10, 2008 to be considered. Comments received after the close of the comment period will be considered to the extent practicable.

If you prefer to mail your comments, you may use the back side of this sheet as a postage-paid, self-mailer. To do so, fold in thirds along the dotted line so the address and postage-paid notice are visible, then secure with tape.

- (3) Lack of design standards from the EPA.
(4) Changes to the hydrology because of pumping from the regional deep carbonate aquifer and exacerbated by global warming.
(5) Short and long term health impacts. I have no data about the number of people who would be sick, short of actual deaths from cancer.
(6) The TA parameters - which are untested & untested.
(7) The effects on the actual amt. of waste due to the international GNEP treaty.
- Stop this project NOW! (fold here) There is no safe way to proceed.]
